EDUCATION

University Of Ibadan, Nigeria 2022 - Present | Computer Science

ALX University of Software Engineering 2024 | Full Stack Software Engineering

PROFESSIONAL EXPERIENCE

XetaDigital – Remote
Full Stack Developer | May 2025 – Present

- Built and deployed a multi-tenant Visitor Management System using Django for the backend and Next.js for the frontend.
- Architected and implemented secure, scalable multi-tenant data isolation logic, ensuring high availability and performance.
- Deployed the full application stack on Amazon AWS, leveraging cloud services for scalability, security, and cost efficiency.
- Integrated real-time features and optimized database queries for enhanced system responsiveness.

AnalogueShifts – Remote
Internship | July 2024 – September 2024

- Developed and deployed the frontend of an online AI-powered resume builder using the Next.js framework in JavaScript.
- Implemented dynamic data collection for user-tailored resume generation.
- Designed and built the frontend for an online internet banking application.
- Collaborated with a team to ensure seamless integration and functionality.

Eccowas Cosmopolitan College – Hybrid
ICT Assistant | September 2021 – June 2024

- Taught ICT skills to students.
- Designed and developed the backend of an online school management system.
- Optimized the system using APIs for detailed insights.
- Collaborated with developers to ensure integration and functionality.

PROJECTS & EXTRACURRICULAR

FashionFi | October 2024
Web app connecting fashion designers with customers; features include measurement tracking, order placement, and in-app wallet.

Flow | November 2024
Full stack social networking app for Nigerian university students with messaging, post creation, and interest-based feeds.
