EDUCATION

ALX University of Software Engineering 2024

full stack software engineering

PROFESSIONAL EXPERIENCE

AnalogueShifts - remote July,2024 – September, 2024

Internship

- Developed and deployed the frontend of an online AI-powered resume builder using the Next.js framework in JavaScript. Implemented dynamic data collection to allow users to input personal information, which was then parsed into selected templates for tailored resume generation.
- Designed and built the frontend for an online internet banking application, focusing on user-friendly and secure interfaces.
- Collaborated with a team of software developers to ensure seamless integration and functionality across applications.

Eccowas cosmopolitan college - Hybrid september,2021 – june, 2024

ICT Assitant

- Taught ICT skills to students, fostering their understanding of modern technology
- Designed and developed the backend of an online school management system with user-friendly and secure interfaces, providing parents with direct access to their child's performance.
- Optimized the system using APIs to provide the school director with comprehensive insights into the school's operations.
- Collaborated with a team of software developers to ensure seamless integration and functionality across applications.

PROJECTS & EXTRACURRICULAR

FashionFi October, 2024

- FashionFi is a web application that connects fashion designers with customers, offering features like measurement tracking and storage, order placement, and a secure virtual wallet for in-app payments.

Flow – *Full Stack Social Networking Web Application* November, 2024

- Flow is a full stack web application built with python Django(backend) and JavaScript Nextjs (frontend). It is an application whose target users are Nigerian university students.
- It's major aim is to keep abreast university students about upcoming social events happening in their respective campuses. It also comes with messaging functions (inter-user or group), post creation and a feed tailored to match users selected area of interests upon signing up.

AdFriend – *Full Stack Chrome Extension Project* February, 2025

- Designed and developed a Chrome extension that replaces ads with user-configurable positive content like motivational quotes and productivity tips. Implemented the frontend using JavaScript, HTML/CSS, and Chrome APIs, while integrating a lightweight Node.js/Express backend for content management and dynamic updates. Focused on clean UI, efficient performance, and a user-friendly experience.

Algorand Hackathon 2024 October, 2024

- Participated in the Algorand Hackathon 2024, leading a team that developed *FashionFi*, an online platform for connecting fashion designers and clients.
- Served as the team leader and frontend developer, building the frontend from concept to completion using the Next.js framework. Our team advanced to the semifinals.

Leadership experience October, 2024

- Led a multidisciplinary team consisting of a backend developer, a UI/UX designer, and myself as the frontend developer. Guided the team to the semifinals of the Algorand Hackathon 2024.
